

Ishmael Burton and Jeremy Jacob Francisco's File Structures.

September 8, 2020.

Ishmael and I, Jeremy, took very individual routes with this assignment, as we didn't see it necessary to collaborate heavily, but we did discuss anything we were unsure of how to do, or if we faced problems. For example, I had no idea how to do the image linking, but Ishmael did, and so I was able to ask him and he showed me how to get my image to show up on my page. Aside from that, Ish and I did not have much trouble, and we got through the assignment efficiently and in a timely manner. Neither Ishmael nor I opted to do the bonus task.

Jeremy Francisco's File Structure. This was pretty easy, thanks to the template pretty much having it all done for us.

Jeremy Jacob Francisco

Hey there, gangsters! My name is Jeremy Jacob Francisco and I'm a Second Year, CD Major here at CSUMB, with a focus on game design. I'm into playing video games, listening to music, drawing, and talking to people. I like listening to the stories different folks have, I like listening to their experiences, and finding out what makes them, them. Also if you haven't noticed, I like to be humorous and to not take every little thing so seriously. I'm hoping that throughout this class I get to learn more about y'all, and we get to be good buds.

I was class clown in high school, but perhaps I've been a clown all my life.

Jeremy Francisco's Index Page. It looks extremely plain as I opted to not do the Task Bonus, but hopefully with the CSS stuff, I'll be able to make it look more interesting.

```

Jeremy Francisco's source code for his Lab 3 page. I had MUCH LESS trouble with getting photos on this page than I did with the index page. It's really weird because I was doing the coding exactly the same for both, in regards to linking images.

```

18 </body>
19 </html>
```

Jeremy Francisco's source code for his index page. I had some trouble getting my photo to appear but thanks to Ish's help, I was able to figure it out and get it to work, so that my very cool photo is on my index page.

Ish- I had no trouble making my folders because they were already given. Also making folders are dumb easy. Hah

Ish Burton

Hello, my name is Ishmael Burton and my interest are art and design. This passion of mine came to the heart in 2015 after I took a Computer Aid Drafting class in high school. I enjoy designing because you can express yourself through your own work. I am crrently in my second year here at CSUMB as communication design major.

Ish- I did have trouble adding my photo for some reason even after I helped Jeremy. I couldn't figure out why. It was stressful.

```

Ish- Making my source code was not too difficult. Although it did take me a while with all the tedious typing. Also because Jermey has a mac we were having some differences.
